

## “Mobile Mapper 6 With Built-in SiRFStarIII GPS, Camera, ”

This little guy is a real workhorse. It has the Windows Mobile 6 operating system, a built-in 12 channel SiRF-StarIII GPS unit, flashlight, 2 megapixel camera, and it runs on two AA batteries. Data collection with the Mobile Mapping 6 software is extremely easy. The Mobile Mapping 6 software can import and export shape files. Users can also create shape files from scratch.

The Mobile Mapper 6 weighs less than 8 ounces and is rugged and waterproof to IPX7 standards. It not only looks good, it can be taken anywhere you need to go. The unit runs on two AA batteries for about 5 hours. It works with any kind of AA battery including alkaline, NiMH, or Lithium Ion.

The Mobile Mapper 6 is perfect for running ArcPad, it can bring up an entire county of NAIP color orthorectified imagery in a MrSid format. With an optional SD memory card, it can store huge amounts of road, stream, street, utility and other types of GIS data.

An optional external GPS antenna is available at minimal cost. This antenna will allow more flexibility in terms of use on top of vehicles and other situations where maximum satellite visibility is important. Another accessory that works perfectly with the Mobile Mapper 6 and ArcPad is the TruPulse 360B laser rangefinder. The TruPulse 360B is great for offset GPS shots in ArcPad.

For users who need a variety of built-in programs, the Mobile Mapper 6 includes Office Mobile (Word, Excel, PowerPoint), a picture and video viewer, and Windows Media Player. It also includes an e-Compass.

#MM6	Price: \$895.00
#MM6 with Mobile Mapping Software	Price: \$995.00
#MobileMappingSoftware Purchased separately	Price: \$195.00
#MM6 with Mobile Mapping SoftwarePP	Price \$1,490.00 (with Post Processing)

## Specifications:

GPS Update Rate 1 Hz  
GPS Real-time Accuracy 2 – 5 meters  
Post Processing Accuracy 1– 2 meters (optional)  
Channels 12 (L1)  
User Selectable standard datums: Yes, in MobileMapping Software and ArcPad Software  
User-definable datums Yes  
Antenna Type: Internal & external  
Unit Height (inches) 5.75  
Unit Width (inches) 2.5  
Unit Depth (inches) 1.13  
Weight 7.9 ounces  
Data Storage 64 MB SDRAM, 128 NAND Flash memory, SD Card up to 4 GB  
Operating System Windows Mobile 6  
Screen Size: 2.7 inches  
Processor 400 MHz  
Shock 1 meter drop to concrete  
Bluetooth Yes  
Temp Min (°C) -20  
Temp Max (°C) 50  
Waterproof IPX7  
Battery life: Rated at 10 hours. Actual life is closer to 4-5 hours  
Post-Processed Accuracy: 1—2 meters **Post Processing Available Now!**
